

VELAGALA JAYA NAGA SANTHOSH REDDY | AI/ML ENGINEER

Aravalli, Andhra Pradesh | velagalas222@gmail.com | +91 77026 90804 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

AI/ML Engineer with hands-on experience in building end-to-end machine learning workflows, including data preprocessing, feature engineering, model development and model evaluation. Proficient in Python and MERN stack (MongoDB, Express.js, React.js, Node.js), integrating ML models into scalable web applications for real-time inference and deploying production-ready systems on AWS using DevOps practices.

Educational Details

B.Tech in Computer Science and Engineering - Data Science

Swarnandhra College Of Engineering and Technology

CGPA: 8.43 | Sep 2022 – Apr 2026

Narsapur, Andhra Pradesh

Technical Skills

Frontend Technologies: HTML, CSS, JavaScript, Tailwind CSS, React.js, TypeScript, Next.js

Backend Technologies: Python, MongoDB, Express.js, Node.js, Flask, MySQL, PostgreSQL

AI & ML: Pandas, NumPy, Matplotlib, Scikit-Learn, TensorFlow, Lang Chain, Streamlit

Tools & Platforms: VS Code, Postman, Jupyter Notebook, Git, GitHub, Netlify, AWS, Docker, Jenkins

Work Experience

Internship in Artificial Intelligence at AIMER Society

Mar 2024 – Jul 2024

- Built a Telegram chatbot integrating OpenWeatherMap API for real-time weather updates, Hugging Face models for question answering, text-to-image generation and table-based insights, along with OpenAI API to enable advanced conversational AI capabilities.
- Developed an object detection model using YOLOv8, achieving accurate real-time identification. Gained hands-on experience in dataset preparation, annotation, and model training using Roboflow.

Projects

Interactive PDF Assistant | Link: [Source Code](#)

Jan 2026 – Feb 2026

- Developed an Interactive PDF Assistant using Ollama, LangChain, ChromaDB, Sentence Transformers, and Streamlit, enabling users to upload documents and query them using natural language with secure offline LLM processing. Implemented semantic search, multilingual support, and text-to-speech functionality to enhance document retrieval and user interaction.

Job Portal Application | Link: [Source Code](#)

Oct 2025 - Mar 2026

- Built a full-stack Job Portal using Next.js, React, TypeScript, MySQL and Drizzle ORM, featuring secure authentication, role-based dashboards, job management and resume uploads. Developed responsive user interfaces with Tailwind CSS and Radix UI, while implementing form validation using React Hook Form and Zod. Integrated TipTap for rich-text editing and UploadThing for seamless file uploads.

Track Pocket - Expense Tracker | Link: [Live Preview](#)

May 2025 - Jun 2025

- Built an Expense Tracker using the MERN stack with JWT-based authentication, enabling users to add, edit and delete income and expenses transactions with automatic balance updates. Integrated interactive charts, responsive UI using Tailwind CSS and deployed the application on Vercel for real-time financial insights.

Potato Leaf Disease Classification | Link: [Source Code](#)

Oct 2024 - Dec 2024

- Developed a CNN-based deep learning model using the TensorFlow and integrated into a Flask web application for real-time potato leaf disease classification, allowing users to upload leaf images and view predictions instantly. Achieved 92% accuracy, enabling fast and reliable disease classification.

Achievements

- Led a team of 5 members and secured 4th place in a college-level hackathon by developing a Django-based digital billboard web application for college announcements and deploying it on AWS.
- Secured 2nd place in a college-level web designing competition by developing a hospital management system.

Certifications

- Python Basics - [Hacker Rank](#)
- Machine Learning Specialization - [Coursera](#)

Hobbies

- Reading tech blogs and staying updated with AI and Software trends.
- Listening to music and Exploring new places.
